

Keyboarding Resources

Learn to Type

Online typing tutorials can be accessed from home or school to help students increase their keyboarding proficiency. Typing instruction should begin with proper form and home row practice, and will increase in complexity over time. Typing drills and games should be used to increase speed and proficiency once the basics have been mastered. Keyboarding fluency is an essential component in the success of Chromebook implementation in Lee County classrooms. The following links are appropriate for elementary, middle, and high school students.
